EXPERIENCE

Dec 2023 – Current

Senior FrontEnd Developer

CBTW Vietnam x Infotrack SignIT - infotrack.com.au

- An easy-to-use electronic signing tool that enables parties to sign documents online in a few simple steps.
- Responsibility:
 - Lead frontend development, collaborate with product owner, QA, and backend engineers.
 - Own frontend architecture decisions, including micro-frontend implementation and technical enhancements.
 - Collaborate with backend engineers on API design and system integration.
 - Work with AWS infrastructure including S3 and CloudFront.
 - Build and scale shared component library with Storybook.
 - Improve development workflow and tooling, significantly cut down local build and startup time.
 - Establish and enforce best practices for code quality, testing, and performance.
 - Maintain CI/CD pipelines and ensure 70% test coverage with Jest.

React / .NET / Vite / Zustand / TailwindCSS / Storybook / TypeScript / NodeJS
/ SCSS / Jest / AWS S3 / CloudFront

Mar 2023 – Dec 2023

Senior FrontEnd Developer

Skedulo Vietnam - skedulo.com

- A platform helps enterprises intelligently schedule, dispatch and track resources - mobile workers.
- Responsibility:
 - Write reusable, maintainable, and well-tested code following team best practices.
 - Analyze business requirements and propose flexible technical solutions.
 - Actively contribute to sprint planning and execution to ensure delivery timelines.
 - Design and integrate GraphQL APIs, including schema design and client-side data fetching.
 - Work with REST services to support business logic and third-party integrations (Salesforce).
 - Collaborate with cross-functional teams in a remote working environment.

React / Vue 2 / Redux / TailwindCSS / TypeScript / GraphQL / Salesforce /
NodeJS / LWC

Sep 2021 – Mar 2023

FrontEnd Developer

Aspire Vietnam - aspireapp.com

- Aspire is the all-in-one finance operating system for growing businesses.
- Responsibility:
 - Collaborate in Agile teams throughout the full SDLC, from requirement analysis to release.
 - Implement features based on Figma design, maintain and optimize frontend performance.
 - Collaborate cross-functionally to ensure alignment between design, backend, and frontend teams.
 - Review pull requests, lead feature demos and knowledge sharing sessions.

Quasar / Vue 3 / Vuex / TypeScript / SCSS / Cypress

Feb 2021 – Sep 2021

Senior Developer

VietSwiss

- Bamboo Project: Lead a team of 3 developers for a food ordering and delivery platform. Manage timelines, review and refactor code, and build reusable UI components. Design and implement RESTful APIs. Techstack: Vue 3, Tailwind CSS, SCSS, Laravel 7, and Nova CMS.
- Kliqs Project: Collaborate on building a 3D homepage and modern landing pages. Implement 3D experiences using Three.js and React Three Fiber. Build static-generated pages with Next.js and integrate GraphQL APIs with Prismic CMS. Tech stack: Vue 3, TailwindCSS, SCSS, Laravel 7, Next.js, Three.js, React Three Fiber, GraphQL

May 2018 – Feb 2021

Software Engineer

fram Vietnam

- Back on Track Project: Maintain and deliver new features for an e-commerce platform for professional trainers.
 - Carmudi Project: Build responsive landing pages and implement new homepage UI for an online car trading platform.
 - Wowmelo Project: Deliver new features, improve UI/UX for a buy now - pay later payment platform.
- Tech stack: Magento, Laravel, React, Vue 2, JavaScript, SCSS, Bootstrap, jQuery

Jan 2018 – May 2018

R&D Programmer

Gameloft

- Research technologies and collaborate with internal teams.
- Implement in-app purchase modules for game projects.

AI USAGE EXPERIENCE

- Use GitHub Copilot, Cursor to accelerate feature development, refactor code, generate unit tests, review code for potential improvements, and update spec files when introducing new functionality. Support documentation writing, PR descriptions, and technical notes to improve team clarity and consistency.
- Apply planning before implementation — clarifying scope, constraints, edge cases, and tech stack decisions. Additionally, ask AI to compare approaches, evaluate trade-offs, and validate choices before coding.
- Use agent with MCP servers to integrate with external tools, such as Jira and Outlook, which reduces manual works. Summarize Jira tickets using MCP, extract key requirements, and plan implementation based on the results.
- Review AI-generated code carefully before committing. Also use AI to support debugging, analyze stack traces, and identify performance bottlenecks.
- Treat AI as a productivity booster while retaining engineering ownership and decision-making responsibility.

PERSONAL PROJECTS

2026

Media Scraper

github.com/thanhtutdt96/media-scraper

Collect images and videos from websites around the world and explore them in one organized gallery.

Node.js / TypeScript / cheerio / BullMQ / PostgreSQL / Prisma / React / shadcn / TailwindCSS / Vite

2025

Horse Racing Game

github.com/thanhtutdt96/horse-racing-game

Interactive horse racing simulation featuring real-time animations, random race logic, and multi-round results.

Vue 3 / Vite / Vuex / TypeScript / TailwindCSS

2023

Elegant Music App

github.com/thanhtutdt96/elegant-music-app

Modern music application allowing users to browse tracks, control playback, and manage audio settings.

React / Redux Toolkit / Vite / TypeScript / TailwindCSS

2022

Modern Calculator

github.com/thanhtutdt96/calculator

Clean and user-friendly calculator application.

Vue 3 / SCSS / Vite / TypeScript / Jest

EDUCATION

2014 – 2018

Bachelor of Computer Science

Ton Duc Thang University

Major of Information Technology

SKILLS

- FrontEnd.
 - React, Vue 2/3, Quasar
 - JavaScript (ES6+), TypeScript
 - HTML5, CSS3, SCSS, TailwindCSS
- State and Data
 - Redux, Redux Toolkit, Zustand, Vuex
- Testing
 - Jest, Cypress, Vitest
- BackEnd
 - Node.js, PHP, Laravel
 - REST APIs, GraphQL
 - Microservices-based architecture
 - MySQL
- Tools
 - Git, GitHub, GitLab
 - Azure DevOps, CI/CD
 - Storybook, Vite

CERTIFICATION

- **English:** Advanced (TOEIC 810)
